PROFESSIONAL SUMMARY

Graduating Computer Engineering student with hands-on experience in software development using Java, Python, JavaScript, Node.js, MySQL, HTML, and CSS. Developed academic and personal projects involving full-stack web development, computer vision, and optimization algorithms. A motivated problem-solver seeking an entry-level software development role where I can contribute my technical skills while continuing to learn and grow.

PROJECTS

E-Barangay System

May 2026

Full Stack Developer

e-barangay-system-tawny.vercel.app

- Developed and deployed a full-stack e-barangay system for residents and barangay personnel using MySQL, Node.js, React.js and Express.js.
- Implemented online document requests, assistance applications, form submissions and community reporting.
- Transformed manual and face-to-face barangay transactions into a centralized digital solution, reducing the need for residents to visit the barangay office and wait in queues.

JOBSHARK

November 2025

Full Stack Developer

- Developed a full-stack freelance job platform using Django, providing separate account experiences for employers and freelance job seekers.
- Implemented job posting and management for employers, along with freelance opportunity searching and application features for job seekers.
- Digitized the freelance hiring process through a centralized platform, making it easier for employers to find independent talent and for freelancers to discover project-based opportunities.

ParkEase

May 2026

Sole Developer

- Developed a functional parking management system using Python, YOLO, and OpenCV to automate vehicle registration and parking transactions.
- Implemented automatic vehicle-type classification, license-plate detection, entry and exit logging, and parking-fee calculation based on the applicable vehicle rate.
- Transformed manual vehicle logging and fee computation into an automated computer-vision solution, improving the speed, consistency, and accuracy of parking operations.

EDUCATION

Batangas State university - Alangilan

2023 - 2027

BS Computer Engineering

Batangas City

SKILLS

- **Skills:** Python; JavaScript; HTML/CSS; React; MySQL; C++ Arduino; Node.js; Express.js; Django; YOLO; Java
